

Wilcor International Inc.  
161 Drive In Road  
Frankfort, NY 13340

April 27, 2020

Dear NCA Members,

Wilcor International is committed to our mission of helping people be outdoors and enjoy every day. Right now the world is experiencing an unprecedented time. We are all being asked to do our part to slowdown the spread of COVID-19 by following measures like social distancing, staying home, closing businesses and schools, and wearing face masks in public spaces. All of these things are effective measures to help our country and the world at large get through this event.

Wilcor International has been and will continue to be opened throughout the COVID-19 Pandemic, and beyond. Since mid-March, for its part, Wilcor International has made the decision to use our well established supply chains both domestic and overseas to help fill in the gaps in Personal protective equipment for Hospitals and Emergency Responders. We have had great success in getting these vital front line workers the equipment they desperately need, like N95 Masks, Gowns, Protective Face Shields, and no-contact thermometers. While this has been rewarding in spite of the many challenges it posed we now want to use these same supply lines to help protect workers and patrons in the outdoor industry. We have been tracking the progress made by many campground owners across the US fighting to stay opened in their States and Counties. While many are still closed, many have been deemed essential for those needing to shelter in place, or those who live their in the spring and summer months. While we are glad to see these businesses opened, we understand there is much concern around the protection of employees and campers. Therefore Wilcor has begun importing and offering a wide variety of consumer protective equipment for campground owners to be able to use for employee protection or to offer to campers for their personal protection. Items like hand sanitizer, gloves, disposable and washable/reusable masks, Thermometers, and face shields are just some of the items we are offering now. We are committed to keeping the supply chain of these items opened until the need is met, and we will always do our best to ensure our pricing remains fair for you and for your customers.

Accompanying this letter you will find information on PPEs, Bandanas & Neck Scarfs, and Sanitizer items. More will be added soon.

## FACE SHIELDS MADE IN NY

price per each

item # 50

**MSC0870** 5.60

Retail 9.99 Case Pack 50

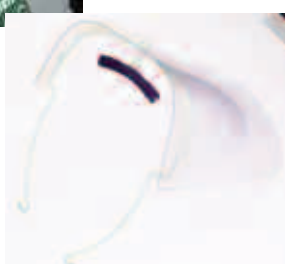

**PRODUCT TYPE:** face shield

**Material:** fiberglass frame that flex-fits to most head sizes for a comfortable fit. At the back, there is a loop system that a user could loop a hair tie or a rubber band into to create a bit of a squeeze to make the fit even more secure.

**1,000 can be produced per day from the day you order for immediate shipping.**  
**IN STOCK 2 DAYS AFTER YOU ORDER.**

### CV19 Shield Assembly Instructions

- 1-Carefully remove shield from bag
- 2-Starting with the center hole, slip the shield over the center notch in the frame.
- 3-Slip an O-ring over the notch. Insure the notch fully captures the O-ring. Do the same for the side holes
- 4-If a more secure fit is desired, slip an elastic band or hair tie around the looped ends of the frame.

**During this COVID-19 pandemic, it is important to keep your mouth and nose covered when you are in a public place to help slow the spread of the virus.**

If you don't have medical masks readily available to you, here is a way to make your own reusable mask using a cotton bandana and hair ties.

CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), especially in areas of significant community-based transmission. CDC also advises the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure.

Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.

The cloth face coverings recommended are not surgical masks or N-95 respirators. Those are critical supplies that must continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance
